EDUCATION

2023-2025
SYMBIOSIS SKILL AND PROFESSIONAL UNIVERSITY

Master's in Data Science
GPA: 8.1 / 10.0

2020-2023
DR.DATAR SCIENCE,DR.BEHERE ARTS,SHREE PILUKAKA JOSHI COMMERCE COLLEGE CHIPLUN,RATNAGIRI

Bacholer's in Computer Science
GPA: 9.37 / 10.0

SKILLS

- Project Management
- Effectiveness
- Teamwork
- Time Management
- Leadership
- Problem Solving
- Critical Thinking

LANGUAGES

- English
- Marathi
- Hindi

PROFILE

RHCSA-certified professional with a strong foundation in Linux system administration, networking, and security. Experienced in managing, troubleshooting, and securing Linux environments, with skills in automation, shell scripting, and process management. Detail-oriented and analytical, with proficiency in Python, data analysis, machine learning, and data visualization, passionate about using data-driven insights to solve complex problems and contribute to impactful projects.

TECHNICAL SKILLS

OPERATING SYSTEM : LINUX

- Managing file system.
- Managing Storage partitions (swap and LVM)
- Knowledge of user and group management
- Managing access control list and file permissions
- Monitoring and managing Linux processes.
- Job scheduling
- Configuring and securing OpenSSH service.
- Analyzing and storing system logs.
- Creating and editing text files with vim.
- Networking: SSH, TCP/IP, DNS, DHCP, Firewalls, iptables
- Security: SELinux, User Permissions, Firewalld.
- Tools: Podman, Git, Docker.
- Knowledge of configuring different servers (SAMBA,NFS,autofs)

PYTHON, MACHINE LEARNING & DATA VISUALIZATION

- Python programming for data analysis
- Data cleaning and preprocessing using Pandas and NumPy
- Data visualization using Matplotlib, Seaborn, and Power BI
- Understanding of basic machine learning algorithms and model evaluation
- Creating interactive dashboards and reports in Power BI

COURSES

Red Hat Certified System Administrator (RHCSA)

PROJECTS

Solar Radiation Prediction Using Machine Learning and Feature Engineering: A Comparative Analysis with AutoML Optimization

Built and optimized models to predict solar radiation using weather data. Applied feature engineering, compared multiple algorithms, and used AutoML for tuning, achieving high accuracy. Identified key meteorological factors influencing solar energy potential.

Power BI Projects

Created Interactive Dashboard on :

- Super Store Sales
- IMDB MOVIE ANALYSIS
